

Track System **TRACKO**

- ⊕ TRACKO is an innovative 24V DC mini track system that combines functionality with modern design.
- ⊕ Thanks to flexible configuration options—both in terms of layout and light sources—it is perfectly suited for use in homes, offices, restaurants, hotels, and even camper vans.

- ⊕ The TRACKO system can be surface-mounted or recessed into the surface. Dedicated mounting brackets are available for both installation options.
- ⊕ The recessed version is ideal for shelves, cabinets, and display cases, where the light subtly highlights objects such as trophies, decorations, or souvenirs.

- ⊕ The track can be fitted with one of three types of luminaires—from spotlights with an adjustable head to a linear fixture with seven light points. One type of luminaire can be used, or a mix can be created to tailor the final effect to a specific function and interior aesthetic.

- ⊕ The system was designed with maximum flexibility in mind and can be installed, for example, as a straight line, an L-shape, or a closed frame. Straight and angled connectors allow the system to be adapted to non-standard spaces. Two power end options are also available—with or without a motion sensor—allowing the system's functionality to be tailored to individual needs.

- ⊕ The track is available in an anthracite finish—a universal, elegant color that complements both dark and light interiors.
- ⊕ The range also includes a USB-C charger that integrates with the track and allows convenient charging of mobile devices. It operates on a 24V DC input and provides a 5V 2A (10W) output.

- ⊕ An example TRACKO system set includes: track + available light sources + a power end (with or without a motion sensor) + additional elements such as a charger, connectors, and mounting brackets. A 24V power supply is required to connect the system.
